plant genomics and gene editing congress europe - global engage is pleased to announce the 7th plant genomics gene editing congress europe taking place 21st-22nd May 2019 in Rotterdam, the Netherlands. This event is part of our widely regarded plant genomics series which includes an Asian and US meeting each year.

 ITER is the world’s largest fusion experiment. Thirty-five nations are collaborating to build and operate the ITER tokamak, the most complex machine ever designed to prove that fusion is a viable source of large-scale, safe, and environmentally friendly energy for the planet.

 Tropical race 4 (TR4) is the name given to the strain of the fungus Fusarium oxysporum f.sp. cubense that causes fusarium wilt aka Panama disease in Cavendish cultivars. The term TR4 was coined to distinguish this race 4 strain from the ones that affect Cavendish cultivars only in the presence of predisposing factors such as low temperatures. The latter are known as subtropical race 4 (TR4).
